

Q1 - Which of the following AWS service have automated backups configured by default?

- 1. Amazon RDS MySQL Database
- 2. MySQL Database installed on EC2
- 3. Amazon Batch
- 4. Amazon Athena

Q1 - Which of the following AWS service have automated backups configured by default?

- 1. Amazon RDS MySQL Database
 - 2. MySQL Database installed on EC2
 - 3. Amazon Batch
 - 4. Amazon Athena

Q2-Which feature of the AWS Cloud helps quickly deliver new functionality iteratively, thereby minimizing the time to market?

- 1. Availability Zones
- 2. Agility
- 3. Elasticity
- 4. Enhanced networking

Q2-Which feature of the AWS Cloud helps quickly deliver new functionality iteratively, thereby minimizing the time to market?

- 1. Availability Zones
- 2. Agility
 - 3. Elasticity
 - 4. Enhanced networking

Q3- Which of the following method should be used to gain programmatic access to AWS resources from the AWS CLI?

- 1. IAM Role
- 2. User ID and Password
- 3. Security Group
- 4. Access Key

Q3- Which of the following method should be used to gain programmatic access to AWS resources from the AWS CLI?

- 1. IAM Role
- 2. User ID and Password
- 3. Security Group
- ✓ 4. Access Key

Q4-What is the billing system for an EC2 instance running the Amazon Linux 2 AMI?

- 1. Per Instance
- 2. Per Second
- 3. Per Minute
- 4. Per Month

Q4-What is the billing system for an EC2 instance running the Amazon Linux 2 AMI?

- 1. Per Instance
- 2. Per Second
 - 3. Per Minute
 - 4. Per Month

Q5-According to the AWS Shared Responsibility Model, which of the following fall under the customer responsibilities? (Select TWO.)

- 1. Setting up encryption on an Amazon S3 bucket
- 2. Physical security of data center facilities
- 3. Patching the EC2 Operating System
- 4. Patching the network infrastructure

Q5-According to the AWS Shared Responsibility Model, which of the following fall under the customer responsibilities? (Select TWO.)

- 1. Setting up encryption on an Amazon S3 bucket
 - 2. Physical security of data center facilities
 - 3. Patching the EC2 Operating System
 - 4. Patching the network infrastructure

Q5-According to the AWS Shared Responsibility Model, which of the following fall under the customer responsibilities? (Select TWO.)

- 1. Setting up encryption on an Amazon S3 bucket
 - 2. Physical security of data center facilities
- ✓ 3. Patching the EC2 Operating System
 - 4. Patching the network infrastructure

Q6-Which of the following technique is based on CloudWatch metrics and threshold values?

- 1. Scheduled Scaling
- 2. Target Tracking
- 3. Step Scaling
- 4. Predictive Scaling

Q6-Which of the following technique is based on CloudWatch metrics and threshold values?

- 1. Scheduled Scaling
- 2. Target Tracking
- ✓ 3. Step Scaling
 - 4. Predictive Scaling

Q7-What is the amount of data that you can store in Amazon S3?

- 1. 100 PB
- 2. 1 PB
- 3. Virtually Unlimited
- 4. 1 EB

Q7-What is the amount of data that you can store in Amazon S3?

- 1. 100 PB
- 2. 1 PB
- 3. Virtually Unlimited
 - 4. 1 EB

Q8-What is a specific benefit of an Enterprise Support plan?

- 1. Included AWS Cloud Architect
- 2. Included Technical Account Manager
- 3. Included AWS Support Analysts
- 4. Included AWS Technical Support Manager

Q8-What is a specific benefit of an Enterprise Support plan?

- 1. Included AWS Cloud Architect
- 2. Included Technical Account Manager
 - 3. Included AWS Support Analysts
 - 4. Included AWS Technical Support Manager

Q9-Which AWS security tool uses an agent installed in EC2 instances to check for any vulnerabilities or unexpected deviations in the application?

- 1. AWS Macie
- 2. AWS Glacier
- 3. AWS Inspector
- 4. AWS KMS

Q9-Which AWS security tool uses an agent installed in EC2 instances to check for any vulnerabilities or unexpected deviations in the application?

- 1. AWS Macie
- 2. AWS Glacier
- 3. AWS Inspector
 - 4. AWS KMS

Q10-Which of the following AWS feature can be used to capture information about inbound and outbound IP traffic on network interfaces in a VPC?

- 1. VPC Peering
- 2. VPC Flow Logs
- 3. Transit Gateway
- 4. Site to Site VPN

Q10-Which of the following AWS feature can be used to capture information about inbound and outbound IP traffic on network interfaces in a VPC?

- 1. VPC Peering
- ✓ 2. VPC Flow Logs
 - 3. Transit Gateway
 - 4. Site to Site VPN

Q11-Which AWS service is designed to be used for operational analytics?

- 1. Amazon Elastic Search
- 2. Amazon Timestream
- 3. Amazon DynamoDB
- 4. Amazon Kinesis

Q11-Which AWS service is designed to be used for operational analytics?

- 1. Amazon Elastic Search
 - 2. Amazon Timestream
 - 3. Amazon DynamoDB
 - 4. Amazon Kinesis

Q12-Which service can be used to monitor, store and access log files generated by EC2 instances and on-premises servers?

- 1. AWS Organization
- 2. Amazon CloudWatch Logs
- 3. Amazon CloudFront
- 4. AWS Global Accelerator

Q12-Which service can be used to monitor, store and access log files generated by EC2 instances and on-premises servers?

- 1. AWS Organization
- 2. Amazon CloudWatch Logs
 - 3. Amazon CloudFront
 - 4. AWS Global Accelerator

Q13-Which of the following components can be configured through the VPC console in AWS? (Select TWO)

- 1. Endpoint
- 2. Subnet
- 3. Security Group
- 4. Key-Pair

Q13-Which of the following components can be configured through the VPC console in AWS? (Select TWO)

- 1. Endpoint
- 2. Subnet
 - 3. Security Group
 - 4. Key-Pair

Q14-Which AWS service provides a managed software version control system?

- 1. AWS CloudWatch
- 2. AWS CodeCommit
- 3. AWS Code Artifact
- 4. AWS CodeBuild

Q14-Which AWS service provides a managed software version control system?

- 1. AWS CloudWatch
- 2. AWS CodeCommit
 - 3. AWS Code Artifact
 - 4. AWS CodeBuild

Q15-Which of the following are the benefits of using the AWS Cloud? (Select TWO)

- 1. Go global in minutes
- 2. Fast provisioning of IT resources
- 3. Zero operational cost
- 4. No risk of losing any data

Q15-Which of the following are the benefits of using the AWS Cloud? (Select TWO)

- ✓ 1. Go global in minutes
 - 2. Fast provisioning of IT resources
 - 3. Zero operational cost
 - 4. No risk of losing any data

Q15-Which of the following are the benefits of using the AWS Cloud? (Select TWO)

- ✓ 1. Go global in minutes
- 2. Fast provisioning of IT resources
 - 3. Zero operational cost
 - 4. No risk of losing any data

Q16-What are the benefits of using AWS Elastic Load Balancing? (Select TWO)

- 1. Reduced capital cost
- 2. Automation
- 3. High Availability
- 4. Elasticity

Q16-What are the benefits of using AWS Elastic Load Balancing? (Select TWO)

- 1. Reduced capital cost
- 2. Automation
- 3. High Availability
 - 4. Elasticity

Q16-What are the benefits of using AWS Elastic Load Balancing? (Select TWO)

- 1. Reduced capital cost
- 2. Automation
- 3. High Availability
- 4. Elasticity

Q17-Which AWS service can be used for assigning a policy to a group?

- 1. IAM
- 2. S3
- 3. EC2
- 4. CloudFormation

Q17-Which AWS service can be used for assigning a policy to a group?

- 1. IAM
 - 2. S3
 - 3. EC2
 - 4. CloudFormation

Q18-Which of the following AWS services offers you compute capabilities? (Select TWO)

- 1. AWS Fargate
- 2. Amazon ECR
- 3. Amazon SQS
- 4. AWS Lambda

Q18-Which of the following AWS services offers you compute capabilities? (Select TWO)

- ✓ 1. AWS Fargate
 - 2. Amazon ECR
 - 3. Amazon SQS
 - 4. AWS Lambda

Q18-Which of the following AWS services offers you compute capabilities? (Select TWO)

- 1. AWS Fargate
 - 2. Amazon ECR
 - 3. Amazon SQS
- 4. AWS Lambda

Q19-Which AWS service allows inbound traffic from the internet to access a VPC?

- 1. Network Access Control List (NaCl)
- 2. NAT Gateway
- 3. Internet Gateway
- 4. Transit Gateway

Q19-Which AWS service allows inbound traffic from the internet to access a VPC?

- 1. Network Access Control List (NaCl)
- 2. NAT Gateway
- - 4. Transit Gateway

Q20-How can you reduce operational overhead for a MySQL database?

- 1. By migrating the database onto an AWS Storage Gateway
- 2. By migrating the database onto a Docker Container
- 3. By migrating the database onto an EC2 instance
- 4. By migrating the database onto an Amazon RDS instance

Q20-How can you reduce operational overhead for a MySQL database?

- 1. By migrating the database onto an AWS Storage Gateway
- 2. By migrating the database onto a Docker Container
- 3. By migrating the database onto an EC2 instance
- ✓ 4. By migrating the database onto an Amazon RDS instance

Q21-What are the services offered by Amazon Route 53? (Select TWO)

- 1. Domain Name System (DNS)
- 2. Data Storage
- 3. Traffic Flow
- 4. Caching

Q21-What are the services offered by Amazon Route 53? (Select TWO)

- ✓ 1. Domain Name System (DNS)
 - 2. Data Storage
 - 3. Traffic Flow
 - 4. Caching

Q21-What are the services offered by Amazon Route 53? (Select TWO)

- ✓ 1. Domain Name System (DNS)
 - 2. Data Storage
- ✓ 3. Traffic Flow
 - 4. Caching

Q22-Which of the following service enables hybrid cloud storage between on-premises and the AWS Cloud?

- 1. Amazon S3
- 2. AWS Snow Family
- 3. AWS Storage Gateway
- 4. AWS Fargate

Q22-Which of the following service enables hybrid cloud storage between on-premises and the AWS Cloud?

- 1. Amazon S3
- 2. AWS Snow Family
- 3. AWS Storage Gateway
 - 4. AWS Fargate

Q23-Which of the following service allows an organization to view operational data from multiple AWS services through a unified user interface and automate operational tasks?

- 1. AWS Service Catalog
- 2. AWS Systems Manager
- 3. AWS Organization
- 4. Trusted Advisors

Q23-Which of the following service allows an organization to view operational data from multiple AWS services through a unified user interface and automate operational tasks?

- 1. AWS Service Catalog
- 2. AWS Systems Manager
 - 3. AWS Organization
 - 4. Trusted Advisors

Q24-Which of the following service can be used as a private git repository in the AWS cloud?

- 1. CodeCommit
- 2. CodeDeploy
- 3. CodePipeline
- 4. CodeBuild

Q24-Which of the following service can be used as a private git repository in the AWS cloud?

- 1. CodeCommit
 - 2. CodeDeploy
 - 3. CodePipeline
 - 4. CodeBuild

Q25-What are the advantages of Availability Zones in cloud computing? (Select TWO)

- 1. With multiple availability zones, the cost is reduced
- 2. It is connected by a low-latency network
- 3. It gives unlimited storage capacity
- 4. It helps in fault isolation

Q25-What are the advantages of Availability Zones in cloud computing? (Select TWO)

- 1. With multiple availability zones, the cost is reduced.
- 2. It is connected by a low-latency network
 - 3. It gives unlimited storage capacity.
 - 4. It helps in fault isolation

Q25-What are the advantages of Availability Zones in cloud computing? (Select TWO)

- 1. With multiple availability zones, the cost is reduced.
- 2. It is connected by a low-latency network
 - 3. It gives unlimited storage capacity.
- 4. It helps in fault isolation

Q26-Which of the following features offers OS-bypass functionality?

- 1. EFA
- 2. ENA
- 3. VPN
- 4. VPC

Q26-Which of the following features offers OS-bypass functionality?

- 1. EFA
- 2. ENA
- 3. VPN
- 4. VPC

Q27-Which Amazon EC2 pricing option provides significant discounts for fixed-term contracts?

- 1. Dedicated Instances
- 2. Spot Instances
- 3. On-Demand Instances
- 4. Reserved Instances

Q27-Which Amazon EC2 pricing option provides significant discounts for fixed-term contracts?

- 1. Dedicated Instances
- 2. Spot Instances
- 3. On-Demand Instances
- 4. Reserved Instances

Q28-Which of the following activities prohibits you from performing any penetration testing? (Select TWO)

- 1. Amazon RDS
- 2. AWS Shield (Standard)
- 3. AWS Shield (Advanced)
- 4. Amazon EC2 instances

Q28-Which of the following activities prohibits you from performing any penetration testing? (Select TWO)

- 1. Amazon RDS
- 2. AWS Shield (Standard)
- 3. AWS Shield (Advanced)
 - 4. Amazon EC2 instances

Q28-Which of the following activities prohibits you from performing any penetration testing? (Select TWO)

- 1. Amazon RDS
- 2. AWS Shield (Standard)
- 3. AWS Shield (Advanced)
 - 4. Amazon EC2 instances

Q29-What are the benefits of deploying a relational database on RDS instead of EC2 in AWS? (Select TWO)

- 1. Automatic backup
- 2. Software patching
- 3. Zero cost
- 4. Unlimited storage

Q29-What are the benefits of deploying a relational database on RDS instead of EC2 in AWS? (Select TWO)

- ✓ 1. Automatic backup
- 2. Software patching
 - 3. Zero cost
 - 4. Unlimited storage

Q30-Which of the following service protects your internet-facing web applications from bot traffic and DDoS attackers?

- 1. AWS CloudTrail
- 2. AWS EMR
- 3. AWS WAF
- 4. AWS Shield Advanced

Q30-Which of the following service protects your internet-facing web applications from bot traffic and DDoS attackers?

- 1. AWS CloudTrail
- 2. AWS EMR
- 3. AWS WAF
 - 4. AWS Shield Advanced

Q31-Which AWS service is used as an instrumentation solution for all cloud applications?

- 1. AWS HSM
- 2. Amazon Batch
- 3. AWS X-Ray
- 4. Amazon QLDB

Q31-Which AWS service is used as an instrumentation solution for all cloud applications?

- 1. AWS HSM
- 2. Amazon Batch
- 3. AWS X-Ray
 - 4. Amazon QLDB

Q32-Which of the following EC2 pricing models allows the customers to use existing server-bound software licenses?

- 1. Dedicated Hosts
- 2. Reserved Instances
- 3. Spot Instances
- 4. On-demand Instances

Q32-Which of the following EC2 pricing models allows the customers to use existing server-bound software licenses?

- ✓ 1. Dedicated Hosts
 - 2. Reserved Instances
 - 3. Spot Instances
 - 4. On-demand Instances

Q33-Which of the following AWS service is used to host a static website?

- 1. S3
- 2. Lambda
- 3. Aurora
- 4. Blockchain

Q33-Which of the following AWS service is used to host a static website?

- ✓ 1. S3
 - 2. Lambda
 - 3. Aurora
 - 4. Blockchain

Q34-Which of the following service can be used to track the activity of users on AWS?

- 1. AWS CloudTrail
- 2. Amazon Elastic Cache
- 3. Amazon Beanstalk
- 4. AWS Cloud Watch

Q34-Which of the following service can be used to track the activity of users on AWS?

- ✓ 1. AWS CloudTrail
 - 2. Amazon Elastic Cache
 - 3. Amazon Beanstalk
 - 4. AWS Cloud Watch

Q35-Which of the following AWS service is used to run a Red Hat operating system upon which you will install custom software?

- 1. AWS DynamoDB
- 2. AWS Lambda
- 3. AWS S3
- 4. AWS EC2

Q35-Which of the following AWS service is used to run a Red Hat operating system upon which you will install custom software?

- 1. AWS DynamoDB
- 2. AWS Lambda
- 3. AWS S3
- ✓ 4. AWS EC2

Q36-Which of the following should be used to improve the security of your AWS Management Console? (Select TWO)

- 1. Strong password policies
- 2. IAM Roles
- 3. MFA
- 4. AWS Key Management Service

Q36-Which of the following should be used to improve the security of your AWS Management Console? (Select TWO)

- ✓ 1. Strong password policies
 - 2. IAM Roles
 - 3. MFA
 - 4. AWS Key Management Service

Q36-Which of the following should be used to improve the security of your AWS Management Console? (Select TWO)

- ✓ 1. Strong password policies
 - 2. IAM Roles
- 3. MFA
 - 4. AWS Key Management Service

Q37-Which of the following is a popular configuration management service for Chef and Puppet?

- 1. AWS Config
- 2. AWS Organization
- 3. AWS CDK
- 4. AWS OpsWorks

Q37-Which of the following is a popular configuration management service for Chef and Puppet?

- 1. AWS Config
- 2. AWS Organization
- 3. AWS CDK
- 4. AWS OpsWorks

Q38-Which of the following AWS service is used to manage configuration versions?

- 1. Trusted Advisors
- 2. AWS Config
- 3. AWS Systems Manager
- 4. AWS Cloud Watch

Q38-Which of the following AWS service is used to manage configuration versions?

- 1. Trusted Advisors
- 2. AWS Config
 - 3. AWS Systems Manager
 - 4. AWS Cloud Watch

Q39-Who is responsible for configuring and performing backups when you require a point-in-time recovery for an Amazon DynamoDB table?

- 1. The customer is responsible for configuring, and AWS is responsible for performing backups
- 2. AWS is responsible for both configuring and performing backups.
- 3. The customer is responsible for both configuring and performing backups
- 4. AWS is responsible for configuring, and the user is responsible for performing backups.

Q39-Who is responsible for configuring and performing backups when you require a point-in-time recovery for an Amazon DynamoDB table?

- 1. The customer is responsible for configuring, and AWS is responsible for performing backups
 - 2. AWS is responsible for both configuring and performing backups.
 - 3. The customer is responsible for both configuring and performing backups
 - 4. AWS is responsible for configuring, and the user is responsible for performing backups.

Q40-Which of the following resource can be used to access security and compliance reports in AWS?

- 1. AWS System Manager
- 2. AWS Artifacts
- 3. AWS Service Health Dashboard
- 4. AWS Service Catalog

Q40-Which of the following resource can be used to access security and compliance reports in AWS?

- 1. AWS System Manager
- 2. AWS Artifacts
 - 3. AWS Service Health Dashboard
 - 4. AWS Service Catalog

Q41-Which of the following are the pillars of AWS Well-Architected Framework? (Select TWO)

- 1. Elasticity and Scalability
- 2. Operational Excellence
- 3. Performance Efficiency
- 4. Data Consistency

Q41-Which of the following are the pillars of AWS Well-Architected Framework? (Select TWO)

- 1. Elasticity and Scalability
- 2. Operational Excellence
- ✓ 3. Performance Efficiency
 - 4. Data Consistency

Q42-What is the scope of AWS VPC?

- 1. Spans across all availability zones within a region
- 2. Spans across only one specified availability zone
- 3. Spans across all availability zones in all regions
- 4. Spans across all the regions

Q42-What is the scope of AWS VPC?

- 1. Spans across all availability zones within a region
 - 2. Spans across only one specified availability zone
 - 3. Spans across all availability zones in all regions
 - 4. Spans across all the regions

Q43-How can you protect your data from a regional disaster in Amazon S3?

- 1. Use Lifecycle rules
- 2. Use Cross-Region Replication (CRR)
- 3. Use Intelligent-Tiering Archive configurations
- 4. Use bucket policy

Q43-How can you protect your data from a regional disaster in Amazon S3?

- 1. Use Lifecycle rules
- 2. Use Cross-Region Replication (CRR)
 - 3. Use Intelligent-Tiering Archive configurations
 - 4. Use bucket policy

Q44-Which of the following AWS service can be used to run Docker containers?

- 1. AWS S3
- 2. AWS Fargate
- 3. AWS Snow Family
- 4. Amazon API Gateway

Q44-Which of the following AWS service can be used to run Docker containers?

- 1. AWS S3
- 2. AWS Fargate
 - 3. AWS Snow Family
 - 4. Amazon API Gateway

Q45-How is using fully managed services beneficial compared to deploying third-party software in Amazon EC2?

- 1. Automated backup
- 2. Reduced capital overhead
- 3. Automated deployment of infrastructure using code
- 4. Reduced operational overhead

Q45-How is using fully managed services beneficial compared to deploying third-party software in Amazon EC2?

- 1. Automated backup
- 2. Reduced capital overhead
- 3. Automated deployment of infrastructure using code
- 4. Reduced operational overhead

Q46-Which of the following is a benefit of the AWS pricing model?

- 1. By providing a promotional offer of 50% every year
- 2. Eliminate all the resources after 50 days.
- 3. Reduce the cost of maintaining idle resources
- 4. Eliminate idle resources

Q46-Which of the following is a benefit of the AWS pricing model?

- 1. By providing a promotional offer of 50% every year
- 2. Eliminate all the resources after 50 days.
- - 4. Eliminate idle resources

Q47-Which AWS service is used to create a billing alarm?

- 1. AWS CloudWatch
- 2. AWS CloudFormation
- 3. AWS CloudFront
- 4. AWS Systems Manager

Q47-Which AWS service is used to create a billing alarm?

- 1. AWS CloudWatch
 - 2. AWS CloudFormation
 - 3. AWS CloudFront
 - 4. AWS Systems Manager

Q48-Which of the following AWS service will assist in lowering the latency and also improving the transfer speed for global users? (Select TWO)

- 1. AWS Global Accelerator
- 2. Amazon CloudFront
- 3. Amazon Beanstalk
- 4. Amazon Lightsail

Q48-Which of the following AWS service will assist in lowering the latency and also improving the transfer speed for global users? (Select TWO)

- 1. AWS Global Accelerator
- 2. Amazon CloudFront
 - 3. Amazon Beanstalk
 - 4. Amazon Lightsail

Q49- Which service can be used to send automated notifications to HTTP endpoints?

- 1. Amazon EKS
- 2. Amazon KMS
- 3. Amazon SNS
- 4. Amazon Lambda

Q49- Which service can be used to send automated notifications to HTTP endpoints?

- 1. Amazon EKS
- 2. Amazon KMS
- 3. Amazon SNS
 - 4. Amazon Lambda

Q50-Which of the following services allows you to store files on AWS? (Select TWO.)

- 1. Amazon EBS
- 2. Amazon SNS
- 3. Amazon EFS
- 4. Amazon EC2

Q50-Which of the following services allows you to store files on AWS? (Select TWO.)

- ✓ 1. Amazon EBS
 - 2. Amazon SNS
- 3. Amazon EFS
 - 4. Amazon EC2

Q51-Which of the following AWS service provides native support for ACID transactions?

- 1. Amazon QuickSight
- 2. Amazon EMR
- 3. Amazon DynamoDB
- 4. Amazon DMS

Q51-Which of the following AWS service provides native support for ACID transactions?

- 1. Amazon QuickSight
- 2. Amazon EMR
- 3. Amazon DynamoDB
 - 4. Amazon DMS

Q52-Which technology helps us in adjusting compute capacity to meet changes in demand?

- 1. Load Balancer
- 2. Auto Scaling
- 3. Trusted Advisors
- 4. Containers

Q52-Which technology helps us in adjusting compute capacity to meet changes in demand?

- 1. Load Balancer
- 2. Auto Scaling
 - 3. Trusted Advisors
 - 4. Containers

Q53-Which of the following statement is incorrect regarding AWS Certificate Manager?

- 1. It removes the time-consuming manual process of purchasing, uploading, and renewing SSL/TLS certificates.
- 2. They are free of charge if you are using them with Elastic Load Balancer
- 3. These certificates are permanent
- 4. You can issue as many certificates as you want

Q53-Which of the following statement is incorrect regarding AWS Certificate Manager?

- 1. It removes the time-consuming manual process of purchasing, uploading, and renewing SSL/TLS certificates.
- 2. They are free of charge if you are using them with Elastic Load Balancer
- 3. These certificates are permanent
 - 4. You can issue as many certificates as you want

Q54-Which of the following service uses SCP to manage permissions?

- 1. AWS Config
- 2. AWS Lambda
- 3. AWS Organizations
- 4. AWS EC2

Q54-Which of the following service uses SCP to manage permissions?

- 1. AWS Config
- 2. AWS Lambda
- 3. AWS Organizations
 - 4. AWS EC2

Q55-Which of the following is the best IAM practices? (Select TWO)

- 1. Use service accounts
- 2. Grant least privilege
- 3. Use policies for applications and users outside the account
- 4. Use customer-managed policies instead of inline policies

Q55-Which of the following is the best IAM practices? (Select TWO)

- 1. Use service accounts
- 2. Grant least privilege
 - 3. Use policies for applications and users outside the account
 - 4. Use customer-managed policies instead of inline policies

Q55-Which of the following is the best IAM practices? (Select TWO)

- 1. Use service accounts
- 2. Grant least privilege
 - 3. Use policies for applications and users outside the account
- ✓ 4. Use customer-managed policies instead of inline policies

Q56-Which AWS support plans provide 24x7 access to customer service?

- 1. Developer.
- 2. Business
- 3. Enterprise
- 4. All plans

Q56-Which AWS support plans provide 24x7 access to customer service?

- 1. Developer.
- 2. Business
- 3. Enterprise
- 4. All plans

Q57-How can you describe the function of Amazon CloudHSM?

- 1. It acts as a firewall against DDoS.
- 2. It applies protection techniques against a malware
- 3. It is used to generate, use and manage encryption keys in the cloud
- 4. It acts as an interface between the user and the computer

Q57-How can you describe the function of Amazon CloudHSM?

- 1. It acts as a firewall against DDoS.
- 2. It applies protection techniques against a malware
- 3. It is used to generate, use and manage encryption keys in the cloud
 - 4. It acts as an interface between the user and the computer

Q58-Which of the following is the best tool for developing a new application and integrating the features of AWS services directly into the application?

- 1. AWS CodeCommit
- 2. AWS SDK
- 3. AWS App Runner
- 4. AWS HSM

Q58-Which of the following is the best tool for developing a new application and integrating the features of AWS services directly into the application?

- 1. AWS CodeCommit
- 2. AWS SDK
 - 3. AWS App Runner
 - 4. AWS HSM

Q59-Which of the following virtualization technology is offered by AWS EC2?

- 1. Storage Virtualization
- 2. Platform Virtualization
- 3. Hardware Virtualization
- 4. Software Virtualization

Q59-Which of the following virtualization technology is offered by AWS EC2?

- 1. Storage Virtualization
- 2. Platform Virtualization
- 3. Hardware Virtualization
 - 4. Software Virtualization

Q60- Which of the following services will notify the users if they need to increase the service limit for an EC2 instance?

- 1. Trusted Advisors
- 2. System Managers
- 3. Service Catalog
- 4. Personal Health Dashboard

Q60- Which of the following services will notify the users if they need to increase the service limit for an EC2 instance?

- 1. Trusted Advisors
 - 2. System Managers
 - 3. Service Catalog
 - 4. Personal Health Dashboard

Q61-How can you transfer hundreds of terabytes of data from your onpremise data center to Amazon S3?

- 1. Using S3 Replication
- 2. Using AWS Snow Family
- 3. Using Docker Containers
- 4. Using AWS Cloud Watch

Q61-How can you transfer hundreds of terabytes of data from your onpremise data center to Amazon S3?

- 1. Using S3 Replication
- 2. Using AWS Snow Family
 - 3. Using Docker Containers
 - 4. Using AWS Cloud Watch

Q62-Which of the following AWS service provides DevOps management and integration?

- 1. AWS CodeStar
- 2. AWS CodeGuru
- 3. AWS Cloud9
- 4. AWS CodePipeline

Q62-Which of the following AWS service provides DevOps management and integration?

- AWS CodeStar
 - 2. AWS CodeGuru
 - 3. AWS Cloud9
 - 4. AWS CodePipeline

Q63-Which of the following service is a fully managed container registry that makes it easy to store, manage, share, and deploy your container images?

- 1. Amazon EKS Distro
- 2. Amazon App Runner
- 3. AWS Glue
- 4. Amazon ECR
